

¹Call to global leaders

In this period of global transformation, we are stepping into unprecedented challenges and opportunities for mankind focused on new human habits and needs. The world is experiencing a historic shift of economic and political power from the traditional base of industrialized countries in Europe and North America to emerging economies.

But this is just the dawn of civilization...

In this new global stage, there is an international need to restore trust between states and their communities in order to provide a strong alliance of global governance and to sustain reform and take collective action. Global Unity for common goals is the superlative form of superior civilization, the next step of high achievement of universal reality. However, the need to ensure legitimacy may run the risk of inaction and there has to be a readiness to lead.

Each country of this world should know the cultures of all the other countries; this creates understanding and with understanding will come trust and sympathy. And this happens also in personal life, fear, envy, and conceit can be prevented only by intimate contact with other minds.

The political or administrative form of a government is of little consequence provided it affords the essentials of civil progress — liberty, security, education, and social co-ordination. It is not what a state is but what it does that determines the course of social evolution. And after all, no state can transcend the moral values of its citizenry as exemplified in their chosen leaders.

No society has progressed very far when it permits idleness or tolerates poverty.

Through the evolutionary path, mankind's struggle to perfect a new unknown system starts by adapting it to ever-changing current needs, in channels of administration, of communication and resources. The ideal form of system must be slowly and laboriously discovered, a wave process with all its ups and downs but exponentially growing. It is imperative to increase our strength in order to find a balanced global system, so that our generations and future generations might benefit and live in perpetual balance of joy and happiness in this world.

It is imperative also, where many politicians are failing, the uplifting of evolution in areas like cultural ethics, civilized morality, and social coherence through global sustainable economical organized development, innovation, religion, regulated financial system, and global laws.

Regarding earth resources and market, the pressure of the consumer system has

¹ www.wapo-int.org

overwhelmed human cultures and Earth's ecosystems. It may bring bigger global disaster.

This is a great opportunity to direct this wave, by transforming our cultures to center on sustainability, that allows all people to thrive while protecting, even restoring, Earth.

Networks of local sustainable agricultures, networks of local small sustainable industry, commerce and services, there are 50 to 60% of world consumers that don't explore their own capacities. Can we all help to restore earth and the economy? Can we create innovative systems and products to make it happen? Yes we can do it, the world already have all resources and advancements it needs to solve social, environmental, economical, political, security and evolution issues. This mankind can help to restore the planet instead of just using the planet...

Globally it is also imperative the reencounter with the human and spiritual side of life to balance the rapid material evolution, and politically, economically and socially we need to think in a global view, acting locally.

In terms of world peace, it cannot be maintained by treaties, diplomacy, foreign policies, alliances, balances of power, or any other type of makeshift juggling with the sovereignties of nationalism. World law must come into being and must be enforced by world government — the sovereignty of all brotherhood of mankind. In this sense and despite criticisms and the high adversity, the UN and G20 are the two world institutions more close to achieve world peace, and all the organizations of the world have a crucial role towards this development. World peace can only also happen in the hearts of man, by periodic paradise revelations to mankind.

How many wars we still have to go through and how many leagues of nations have to fail so that mankind start to understand the need for a world government and so that it may enjoy balanced perpetual peace and goodwill among men.

Evolution can be delayed but it cannot be stopped and Freedom, the freedom for evolution is the gift of civilization made possible by the enforcement of LAW

In all the problems of this world there is an equivalent opportunity, are we searching for this opportunities?

Some of the major opportunities for this new age are:

1. The constant difference of resources in countries, the lack in some countries and the abundance on others will act as engine for growth and again can help to meet interests more closely. This will provide the creation of new markets and development of new technologies (for food, water, transport, communications, energy and industry in general) but this time the needs will be met more efficiently for this new opportunities. (New Global Markets)

2. Dealing with the global problems creates an opportunity for global collective management. In global problems, regional problems and local problems the need for achievement will force trust and transparency, specially in prevention of peace, to ensure security, development of solid businesses, law, environment and social coherence, this points will become much more recognised as common global responsibilities. (Global awareness)
3. The Governments become far more efficient in managing inter connected foreign and internal issues, that leads to an increased ability to manage complex international and national systems and a more influential presence in the global system, and in this period of knowledge and IT, society will became more close and motivated in several new activities in understanding the differences of all the cultures, shrinking the global distance and creating a sense of global responsibility. (Global efficiency)
4. This pause period of post-growth and the global economic crisis provided an opportunity for the UN to be reformed internally and externally. The UN is the only world institution more close to bring world peace and with transparency can serve as the way of communication for countries and organisations, and have with all the connected organisations a great emerging role in global governance.(Global governance).
5. The growth and awareness of international law offers a protection and shape of society to individuals and states. International law will improve the society in a global scale. There is a possibility, with the UN, of legal systems being used to channel diplomatic, military, political and business disputes. (Global law)

To all the different cultures, to all the people in this world, there are many points that we all have in common and that unite us, in diplomacy, in trade, in religion, in personality, in play and joy, in development, in knowledge, in family (human or divine) and it is by our universal duty to search for this points, because with human beings and divinity everything is evolutionarily already in common in eternity.

Human society would be also greatly improved if the civilized races would more generally return to the family-council

Family life is the promoter of true morality, the ancestor of the consciousness of loyalty to duty. The enforced associations of family life stabilise personality and stimulate its growth through the compulsion of necessary adjustment to other and diverse personalities.

Real families are built upon tolerance, patience, and forgiveness and in this real

world human family that we live in, the base is the same.

Families, groups, nations, races are relationships of association which possess individuality; and therefore does every member of any such group, large or small, reap the benefits and suffer the consequences of the rightdoing and the wrongdoing of all other members of the group concerned

It is the structure of the family that provides the good social development. The present state of women and children worldwide, in terms of their access to health care, nutrition, and education can not be ignored. Investment in women and children would ensure that the family structure remains intact and future generations are brought up in a healthy and secure environment.

When we are born, the psychology of a child is naturally positive, not negative. So many human beings are negative because they were so trained. In the absence of wrong teaching, the mind of the normal child moves positively, in the emergence of religious consciousness, toward moral righteousness and social ministry, rather than negatively, there are still many points to be addressed in the educational side of society, to allow us to evolve into this natural positive development.

If people do wrong things, it doesn't mean that they are not good, they are directly and indirectly coming universally of goodness, beauty and truth, they were just caught in the complexity of evolutionary experimental paths, and the difficulties they all represent and in disease that can influence sane decisions. It requires faith and a great and noble character, having started out wrong, to turn about and go right. All too often one's own mind tends to justify continuance in the path of error when once it is entered upon. There is still time and the way is open, the universal hand of this goodness, beauty and truth is extended to you...

In this time of crisis, the most immediate and the most important need are really the children, they will walk the bridge through chaos so that the next generations may proceed in balance, and mercy is needed for adults and all the attention should be focused on children, no matter what happens in the world, because they are the reconstruction of earth and the future of the human race in an ever-expanding and progressing universal identity.

Regarding women empowerment and equality, can they be the good solution for overpopulation ? (beside also space colonialism) when women are instructed and educated, they are more wise in planning family (less births), and also if women work they will not have time to have many kids, besides that, the educated woman are more capable to brought up stronger children (that can better contribute to society) and they will understand better the right to chose to have or not to have children.

Regarding religious believe, the search for God is eternal, meaning that knowledge about God is ending in eternity and starting on the hearts of human beings, country leaders should understand the importance of religious freedom under the Universal declaration of human rights from the UN, religion to be efficient, needs to be dynamic and evolutionary like love it self is, and it can only happen in openness, respect and humility.

This is a call to all the small NGOs that work so close to the problems and to the leaders of the countries that are able to allow them to develop and to give them the credibility to expand, (Organizations and Government)

This is a call, under the universal laws and human and religious rights, for the balance between morality, duty and freedom and to bring the true and beautiful loving presence of the supreme Creator from Paradise into the hearts of men, and meet the physical and spiritual needs of those who suffer with no reason, (Peace with religion)

This is a call for the collective action to all the leaders of the world..even you that are unemployed, even you that run your country, your region or your business, even you that take care with love of your kids, even you that dont have a house or live in suffering and poverty.(Social, spiritual, environmental, innovation and business-economical leaderships)

This is a call to all of you to find your family and recharge your future, to find your Universe Father-God in an amplified vision of cosmic family and find your eternal life. (Family)

This is a call for the investment in children for the future of the world and the investment in women for the balance of the world, they will then be the reconstruction of the planet. (Women and children)

It is the business and duty of society created by all of you leaders of the world, to protect our planet and provide the child of nature with a fair and peaceful opportunity to pursue self-maintenance, participate in self-perpetuation, while at the same time enjoying some measure of self-gratification, the sum of all three constituting human happiness. (Duty and society)

Just imagine the impossible things that we could do in this world if we could all cooperate a little bit more together, the old world is over and the new one is about to be born..we all in this world count with your part...
