

This world belongs to all of us, we are all responsible for each other in this planet and for taking care of our planet. One of the most important lessons from this lifetime is teamwork , a region on this planet don't belong just to a group of people .. a region directly impacts in an interconnected world, all parts of this world should belong to all the people of the world...

We must have faith ...we are all connected by the spirit.. Belief may not be able to resist doubt and withstand fear, but faith is always triumphant over doubting, for faith is both positive and living. The positive always has the advantage over the negative, truth over error, experience over theory, spiritual realities over the isolated facts of time and space.

All persons in this world are of enormous importance, each one of us is unique, we are not just a number from a system, the only way that we can feel that uniqueness by being in family (revitalizing the family cell in society), to understand the humanity' universal brother and sisterhood of all in helping and sharing each other's burdens and connect with universal spiritual insights in a large cosmic family upgraded vision for the whole of humanity...

What you are today is not so important as what you are becoming day by day and in eternity.

The flight of genius neutralized by the gravity of mediocrity; the progress of the good retarded by the inertia of the bad; the art of the beautiful besmirched by the presence of evil; the buoyancy of health neutralized by the debility of disease; the fountain of faith polluted by the poisons of fear; the spring of joy embittered by the waters of sorrow; the gladness of anticipation disillusioned by the bitterness of realization; the joys of living ever threatened by the sorrows of death. Such a life on such a planet! but still you prevail in happiness and success.
