

The manifesto of

**WORLD ALLIANCE OF PEOPLES' ORGANISATIONS**

**For the good future of mankind**

London, 12<sup>th</sup> October 2010

Address: 3rd Floor 207 Regent Street, London W1B 3HH, UK

e-mail: [wapohq@gmail.com](mailto:wapohq@gmail.com)

web: [www.wapo-int.org](http://www.wapo-int.org)

*"The future is not something impossible to make happen; actually it is something so highly possible to be exceeded in such a way that we hardly can understand" Agostinho da Silva.*

## **Preamble**

The dawn of a new possible progress dialogue for the human evolution...

The World Alliance of Peoples' Organizations is the first world political/institutional dialogue initiative, that has a very intense advanced vision of the future of earth civilization, on new political-financial systems, new technologies, new infrastructures, space exploration, balance of human rights, new physical and spiritual advancements, urban development and the precious meaning of life on earth; delivering effective political party and Institutional/organizational assistance and focused on building relationships and articulation of cooperation, in order to improve performance and reduce any type of friction in the world system, strengthening political/institutional systems, promoting honest governance, respect, solutions, transparency and ethical evolution in a worldwide scale.

The WAPO agenda of resurgence articulates the aspirations of the people of the world and spells out the vision of a modern system that advocates happiness, tolerance, moderation and freedom. We look to the future with faith and confidence as we set on a course to political stability, social harmony, and economic prosperity for all.

This is an imperative movement for the world that embraces the interests of all human race, in a time of great difficulty. This people of the world, whose cultural diversities blend into common goals and aspirations for an ethical and just society based on a good and developed culture and the rule of law, free from ignorance, oppression or corruption.

Our strength lies in people and their proper representatives. Human development would thus remain our highest priority. We must cultivate and allow every opportunity for the new and for the good to flourish.

The family and the financial systems...

We must though think about establishing in, a new proper world regulated financial system and a possible world trading currency, as the base to do everything else for our future generations, letting all nations rule their own currencies, with a strong, ethical and solid international financial structure, we then will be able to proceed to the future with confidence.

It is also the structure of the family that provides the good social development. The present state of women and children worldwide, in terms of their access to health care, nutrition, and education can not be ignored. Investment in women and children would ensure that the family structure remains intact and future generations are brought up in a healthy and secure environment.

And let us have the eyes on space exploration and in a new possible educational system...

## Purposes

- I. To Unite humanity with the best value that all peoples' organizations have to offer, under a loving-open and respectful dialog between all parts.
- II. To contribute to guide the two path lines of Liberty and destiny and meet them in one single path for humanity, respecting each nation good strategy of development and decisions.
- III. To prize the values of love, beauty, respect, truth, family, morality, faith, justice and harmony to all nations and through all humanity's universal evolution.
- IV. To promote and stimulate intelligent universal management focused on serving the well being and progress of each human person.
- V. To guide reproduction wisely
- VI. To respect each nation's natural progress and evolution.
- VII. To help to protect people and nations with fairness and justice.
- VIII. May all nations rule internally resolving external disputes in a proper and efficient world system.
- IX. To balance personal rights in tolerance with social duties.
- X. To promote universal transparency.
- XI. To help to create a sustainable global economy, fair to all parts, nations and their citizens.
- XII. To balance the world with the beauty of the infinite universal laws.
- XIII. To promote the implementation of 25 missions for the world as follows:

1. Contribute for a system with transparency, respect, truth and fairness
2. Erase world poverty
3. World infrastructure projects
4. New modern urban architecture and organization
5. Food production
6. Environmental projects and systems
7. Tourism
8. Energy technologies
9. New creative science and technology
10. New creative educational systems
11. New world justice system
12. New worldwide health systems
13. New world regulated banking system
14. New creative culture
15. Maintenance of peace
16. Security
17. To give the people in the world to have a chance to an opinion on all subjects
18. Local and International Business
19. Jobs
20. Space exploration and all developments at all levels that space exploration will bring
21. New Transportation systems
22. New Communications systems
23. To balance the levels of earth resources and the human population in the world
24. To help preserve species that are near extinction
25. To contribute for the development and evolution of Religion and faith

## The 25 Missions

### 1. Contribute for a system with transparency, respect, truth and fairness

The real freedom and transparency is expressed when there is no obstacle direct or indirect, in the system for the progress of the evolutionary human beings that live on this planet.

The respect for any human being or chaos, for those that don't understand Chaos or other human beings; it is the starting point of the mastery of life, Chaos can be an order, if we see it in an evolved point of view.

The respect is also when we can achieve something without violating the rights of others.

It's the 6 billion people in the world that create their own rules that are against one person, and even so, that person can still respect those 6 billion people and their rules.

It's the tolerance and Love for the little sacrifice against our private rules, which opens the door to the action that will lead to the achievement. It's the full control of all emotions.

Truth and justice based on balanced penalties for those that in a moment of weakness decide disrespect the entire other 6 billion people directly or indirectly.

We will promote:

- The Increasing of Political Accountability
- Strengthening Civil Society Participation
- Creating a Competitive Private Sector
- Institutional Restraints on Power
- Improving Public Sector Management
- Commission for political, social and business ethics

### 2. Erase world poverty

To erase all forms of poverty:

**Extreme (or absolute) poverty:** Living in extreme poverty (less than \$1 a day) mean not being able to afford the most basic necessities to ensure survival. 8 million people a year die from absolute poverty.

**Moderate poverty:** Moderate poverty, defined as earning about \$1 to \$2 a day, enables households to just barely meet their basic needs, but they still must forgo many of the things-education, health care-that many of us take for granted. The smallest misfortune (health issue, job loss, etc.) threatens survival.

**Relative poverty:** Lastly, relative poverty means that a household has an income below the national average.

- Each year, more than 8 million people around the world die because they are too poor to stay alive.
- Over 1 billion people—1 in 6 people around the world—live in extreme poverty, defined as living on less than \$1 a day.
- More than 800 million go hungry each day.
- 80% of the world population lives with less than \$10 a day.
- Over 100 million primary school-age children cannot go to school.
- Nearly 3 billion people—half of the world's population—are considered poor.

But poverty it's about men, women and children enduring unimaginable obstacles that keep them from fulfilling their most basic human rights and achieving their individual potentials.

We shall contribute to promote globally:

- Investment
- Trade
- Micro credit
- Erase corruption and end with dangerous economical cycles.

### **3. World infrastructure projects**

The promotion with the cooperation of World international institutions, private capital and risk capital institutions and possible other cooperation's, the following infrastructures for any region/country in the world to develop and to be connected to each other:

- Urban & Rural Infrastructures Development
- Urban & Rural new and renewable Energy Infrastructures Development
- Urban & Rural Power Generation and Distribution for Agriculture Farms
- Education Children, Young, Adult: Infantile, Basic, Secondary, Professional, Technical and University
- Support and Development Communication and Computer Schools
- Culture of the all world Languages
- Hospitals or Clinics & Health
- Develop of the vineyard and viniculture
- Support Residences to Children and to Senior
- Reconstruction of the Cultural Patrimony
- Micro – Financing Services to Personal Development
- Water & Sewage, Irrigation
- Intelligence and Development Projects to Investigation News Products
- Industrial Innovative Factories Project
- Agriculture Projects
- Support to the Development of the Commerce, Industries and Services
- Support for the Protection of the environment and sea species ( in countries near the sea)
- Support for the Investigation and development sea species
- Support for the environmental development, and use of the Garbage's
- Support for the Scientific Investigation and development innovative Projects
- Support to the storms and catastrophes and crisis seismic
- Aquaculture Projects
- Fish Boats
- Creation of sea and river ports
- Tourism Infrastructures
- Marketing to divulge Products Made in each country
- Marketing to divulge Tourist Paradise
- Support for the Protection and Assistance of HIV/AIDS
- Population Social Development
- Low Cost Affordable Social Housing
- Rail Infrastructure on earth
- Infrastructures on the moon
- Infrastructures on Mars
- Infrastructures in space in general

#### **4. New modern urban architecture and organization**

The promotion of sophisticated structure and technology to built a revolutionary urban environment such as:

- Pyramids, skyscraper, small and creative houses constructed and linked with continuous transportation networks
- Reconstruction of old buildings
- Auto-constructed houses
- Automatic sewerage, water and waste recycle system for each house
- Use of high advanced materials in terms of thermodynamics, resistance, conductivity, hardness, flexibility, design, isolation, etc..
- Auto generation of electricity to each house
- Promotion of space cities outside of the earth.

#### **5. Food production**

Millions of farms have gone bankrupt, in the midst of this hunger catastrophe.

We need to promote investment and to reduce Bureaucracy, for fishing and agricultural production generally in the world and especially in India, Russia, South America and Africa.

#### **6. Environmental projects and systems**

To promote environmental projects and systems to avoid:

- Contaminated water
- Watersheds
- Wetlands
- Composting
- Acid Rain
- Contaminated air
- Waste Recycling systems
- Invasive plants or animals can have a profound impact on ecosystems. When allowed to proliferate, they can kill off indigenous plant or animal life, causing whole natural habitats to change.

#### **7. Tourism**

The promotion of the future world and space Tourism, based on travelling, accommodation and activities on earth and in Space.

A new advanced vision for the creation of emotions.

#### **8. Energy technologies**

To promote new energy technologies based on electromagnetism, cold fusion, nuclear transmutation process of water, water as a fuel and other new technologies.

#### **9. New creative science and technology**

Because mankind is living in a very primitive stage of development, we haven't discovered nothing compared to what it has to be discovered, se shall contribute to:

- Investment
- Promote open mind thoughts.
- Contribute to erase pride and self centred minds

## **10. New creative educational systems**

Education is a critical piece of the development puzzle. Research indicates that investment in education may be one of the highest yield investments available in the developing world. Education attacks poverty at its roots, and strengthens individuals, families and communities. In addition to equipping a child with the knowledge and skills needed for a productive life, universal primary education offers societies even deeper and wider returns for health and economic growth.

Expanding access to quality education in Infantile, Basic, Secondary, Professional, Technical and University

This means a new structure plan that includes new programs in all stages:

- Investment in new international social interactive educational programs.
- Development of these social interaction international programs in History, philosophy, entrepreneurship, personal development and theology in a view from all religions.
- After 3 years students can teach those in the more junior classes.
- Those with learning difficulties can be trained in agriculture and in industry basic jobs.

## **11. New world justice system**

To contribute to create a new world institution for the regulation and implementation worldwide of:

- Banking Laws
- Environmental and Natural Resources Laws
- Indigenous Peoples protection laws
- Anti-corruption Laws
- Infrastructure Laws
- Insolvency and Creditor Rights
- Intellectual Property Rights
- Other International Laws
- Internet and Communications Technology (ICT) Laws
- Involuntary Resettlement
- Justice for the Poor
- Land Laws
- Privatization and the Law
- Public Health
- Space exploration Laws

## **12. New worldwide health systems**

To create new health systems in order that people can access to basic health requirements easily, and promote access to more complex health systems with the help of credit systems to the poorer classes.

## **13. New world regulated banking system**

A new proper world regulated financial system and a world trading currency,  
To reduce the world speculative markets and restart a new banking system based on the existing production and put the older one into a possible bankruptcy reorganization.

#### **14. New creative culture**

To promote new modern patterns of human activity and the symbolic structures that give such way the significance and importance.

To cultivate the old ways as a sequence and stimulate creative and spiritual new ways of life including arts, beliefs and institutions of a population. This includes new codes of manners, dress, language, religion, rituals, norms of behavior such as law and morality, and systems of belief as well as the art.

the birth of a new universal human capacity and activities to classify, codify and communicate their experiences materially and symbolically towards a new vision of the super universe.

#### **15. Maintenance of peace**

To propose to low the investment in defence from all the countries in the world and point the investment to a more peaceful human sustainable action for the planet.

The society will never be peaceful, because of the injustice of the oppression, we shall:

- Implement international laws
- Erase corruption
- Promote the respect between all sides
- Understand all sides either in a point of view they are good or bad
- And the right for anyone to explain their points of view

#### **16. Security**

Promote security measures for local and global conditions:

- To erase poverty
- To create conditions for countries to low the defence systems
- Promote personal security based on devices, services, Improvements and procedures
- Promote personal development and insertion on the society to people with troubled past.
- Possibility of Insertion of criminals into agricultural heavy work.

#### **17. To give the people in the world to have a chance to an opinion on all subjects**

To give a chance for people to vote and create petitions online and express their opinions on all the subjects.

#### **18. Local and International Business**

The global economic integration accelerates due to the intensification of trade and capital flows, the consolidation of financial markets, the reduction of transport costs and the revolution in the field of information technology and communication. This is creating unprecedented opportunities for growth and development; millions of business are generated every day in international markets. However, is also putting new pressures on natural resources.

Companies are responding to these changes, combining advanced technologies and foreign capital with wide availability of labour increasingly qualified in developing countries. The chains of Global supplies are changing as companies outsource production and services complex for economies of lower costs. The components of a given product may be sourced in several countries, replacing traditional trade in finished products.

A gradual opening of trade is an important source of productivity gains, growth and development of jobs. It is a key factor in reducing poverty and promoting development, which in the longer term, can contribute to meet many of the factors underlying the global challenges we face, provided security from migration to climate change.

Major emerging economies, especially China, India and Brazil, are reaping the fruits of their increased participation in world trade. Together they now represent 15% of trade flows world.

Based on progressive liberalization, the growth of these countries was crucial for their historic achievement in lifting millions out of poverty.

This actions need to be balanced with a waste recycling system and articulated with the amount of peoples needs.

## **19. Jobs**

The promotion of trade, investment, micro-business and businesses worldwide, for the creation of jobs.

## **20. Space exploration and all developments at all levels that space exploration will bring**

Space its not really the final frontier, it's the next step to be explored, we need to expand Space exploration in the following areas:

- Mining minerals in other planets
- Tourism
- Development of Urban cities in other planets and in space
- Creation of space and other planets Infrastructure
- Space transportation
- The study of other possible life forms in space, and if they exist, the development of new regulations and laws for development of cooperative affords, having in mind that any living creature on the universe have rights.

## **21. New Transportation systems**

The need for new flexible, low cost and simple infrastructure, high technological vehicles, and operations, internally and with each neighbor countries.

Need for fixed installations necessary for transport, and may be roads, railways, airways, space systems, waterways, canals and pipelines or terminals such as airports, railway stations, bus stations, space stations and seaports.

Vehicles traveling on the network include automobiles, bicycles, buses, trains, aircraft and spacecrafts.

Operations deal with the way the vehicles are operated, and the procedures set for this purpose including the financing, legalities and policies. In the transport industry, operations, and ownership of infrastructure, are both public and private, depending on the country and mode.

Passenger transport may be public or private. Freight transport has become focused on containerization, while bulk transport is used for large volumes or durable items. Transport plays an important part in economic growth and globalization, but has a deteriorating impact on the environment. While it is heavily subsidized by governments, good planning of transport is essential to make traffic flow, and restrain urban sprawl.

The need for new technologies in the area of transportation is imperative.

## **22. New Communications systems**

To implement new ways of free or low cost communications, and develop new communications systems for each human being.

### **23. To balance the levels of earth resources and the human population in the world**

To produce studies of the balanced relations between earth resources and human supply for good life conditions, and propose measures approved by the people to create balance based on the results. And to avoid possible overpopulation we propose the need to have intelligent management, a form of birth control or space colonization.

### **24. To help preserve species that are near extinction**

We shall promote sustainable actions and laws to balance industrialization, urbanization and human impact with our planet.

The Forest loss and degradation is mostly caused by the expansion of agricultural land, intensive harvesting of timber, wood for fuel and other forest products, as well as overgrazing.

Human impact on terrestrial and marine natural resources results in marine and coastal degradation. Population growth, urbanization, industrialization and tourism are all factors.

### **25. To contribute for the development and evolution of Religion and faith**

We have now entered in one of the most important eras of mankind, the era of the development of the human consciousness.

Consciousness may involve new thoughts, sensations, perceptions, moods, emotions, dreams, and an awareness of self, although not necessarily any particular one or combination of these.

This is the era where man will learn to achieve the unachievable and think the unthinkable.

By the changing of thought we change our future, it's the simple relation between the only thing that a human being have full control and that is thought in nature.

The ability to create is a given gift. A gift given somehow to everyone without exception. We shall contribute for people to know more about religions and the respect that each religion deserves.
