

WAPO message for 2015

The year of 2015 will bring the continuation for the good changes in the planet, planet earth's success in Universal levels is being gradually accomplished, and the more we are open in our hearts to the love of God, the fastest we can gradually be "there", but we still have several difficulties to face.

The profit motivation:

- Present-day profit-motivated economics is doomed unless profit motives can be augmented by service motives. Ruthless competition based on narrow-minded self-interest is ultimately destructive of even those things which it seeks to maintain. Exclusive and self-serving profit motivation is incompatible with Christian ideals — much more incompatible with the teachings of Jesus.
- In economics, profit motivation is to service motivation what fear is to love in religion. But the profit motive must not be suddenly destroyed or removed; it keeps many otherwise slothful mortals hard at work. It is not necessary, however, that this social energy arouser be forever selfish in its objectives.
- The profit motive of economic activities is altogether base and wholly unworthy of an advanced order of society; nevertheless, it is an indispensable factor throughout the earlier phases of civilization. Profit motivation must not be taken away from mankind until they have firmly possessed themselves of superior types of nonprofit motives for economic striving and social serving — the transcendent urges of superlative wisdom, intriguing brotherhood, and excellency of spiritual attainment.

Major Global problems:

- For the Iran-Israel problem - immediate inspections program is needed in both countries, not to waste time with long negotiations, only the essential and efficient ones.
- For ISIL - new country(s) need to be negotiated and established, so that there is a focus area for positive action and not disperse surprises, the tensions of the middle east areas will be adjusted in new territories and new treaties need to be agreed with external countries.
- For Russia-Nato – Europe should be more active and prepared to diplomatically deal with Russia, the way of dialogue is still open, and a balance point needs to be reached on both parts, USA and Russia urgently needs to jointly lead nuclear weapons reduction program with practical actions and not just paper treaties, cultural adjustments needs to exist from all parts towards Universal realities and understanding.
- North Korea openness to the world needs communications with and via China and needs integration in international media, social and sports events, it takes time and cultural tolerance.
- New economic block banks emerging can be a way to reach cultures within their own culture; it would be useful, under an independent global system, a global cooperation with all emerging energies.
- The problem of secularism: no social system or political regime which denies the reality of God can contribute in any constructive and lasting manner to the advancement of human civilization. But Christianity, as it is subdivided and secularized today, presents the greatest single obstacle to its further advancement; especially is this true concerning the Orient.

For the Good Future of Mankind

WORLD ALLIANCE OF PEOPLES' ORGANIZATIONS

- The problem of using old type technologies like wheels in cars, burning fuels, nuclear fission, wind mills etc...and the cocoon blocking progress, created by old fashioned scientists for man's search for knowledge, science and the universe; science these days is only affordable to large corporations and their objectives and should be available to all.

Technology development for life improvement and new markets:

- There should be also a culture of technological development, that should not only be for large corporations but for every single human being, from the "home garage" to the universities, we need to find new markets and new ways of doing things for the very first time.
- The conquest of energy and gravity for all mankind and space will open the doors into the unknown and jump into a future path that will leave some the current problems in the past.

There should be balance for the exaggeration and lack of ideas of the west and unawareness of the east, there is still time and the way is open. Throughout the universe, every unit is regarded as a part of the whole, are we all starting to be aware that we all have a responsibility on each other at any level.

And let the term "faith" stand for the individual's relation to God rather than for the credal formulation of what some group of mortals have been able to agree upon as a common religious attitude.

Thus does the so-called Christian church become the cocoon in which the kingdom of Jesus' concept now slumbers. The kingdom of the divine brotherhood is still alive and will eventually and certainly come forth from this long submergence, just as surely as the butterfly eventually emerges as the beautiful unfolding of its less attractive creature of metamorphic development.

May the Father in Heaven, our Universal leader Jesus, and the Holy Spirit be with us all and guide us to do the will of the Universal Father.
